JEDOX ACADEMY

jedox.

COURSE

300
Jedox Specialist Level Courses
Jedox Web & Jedox Datenintegration

Duration 24 hours

Smart planning. Effective reporting. Extract, transform, and load data.
Discover the essential Jedox Web and ETL features with this learning path.

COURSE OBJECTIVES

After completing this learning path, you will know how to extend your Jedox application.
You will receive an overview of the following components:
- Create dynamic web reports
- Integrate data automatically

TARGET GROUP

This learning path is intended for anyone who wants to gain an overview of the Web and ETL components of Jedox.

THE TRAINING COVERS

Jedox Web
- Form elements and variables
- Use of DynaRanges
Jedox Integrator
- Simple data extraction and transformation
- Loading dimensions and cubes

REQUIREMENTS

Participants will have the greatest chance of success if they have some or all of the following prerequisites:
You are already familiar with the Specialist level.
In particular, the following is expected:
- Understanding of a Jedox data model (dimensions, elements, attributes, cubes)
- Knowledge of how subsets function
- Ability to distinguish between relational and multidimensional data storage
