

COURSE

451

Jedox ETL Expert

Transformation of complex data structures

Duration 2 Days

Go from Professional to ETL Expert. Expand your skills in Jedox ETL and learn advanced techniques with this course.

COURSE OBJECTIVES

After the training you will be able to:

- transfer, delete or load data more efficiently
- Analyze data in more details by using drill-throughs
- Use functions such as Field Normalization or Count on the basis of examples

TARGET GROUP

This course is directed at those who want to improve the design of data load processes with enhanced ETL functionalities.

THE TRAINING COVERS

- Efficient deletion of data using Cube slice
- Efficient transfer of data using CubeSlice Copy
- Extract XML & JSON data
- Loop-based data load
- Data reconciliation in a source system using Field Normalization
- Detailed data analysis using Drill-Through
- Rolling Period using Count

REQUIREMENTS

- Participation in course 356 Integration Professional or equivalent knowledge
- To be most successful, students should have some or, at best, all of the following background:
- Ability to create file connections, extracts, transforms, loads
 - Sound knowledge of job execution and adjustment of given objects
